- Full Digital Duplex Conferencing
- 120-Minute Conference Recording
- Caller ID¹
- Memory Dialer

Panasonic ideas for life

The new Panasonic KX-TS730 Conference Speakerphone... making every chair the best seat in the conference room

Cutting edge technology, style and convenience make the Panasonic KX-TS730 conference speakerphone perfect for any work environment, from home offices to small businesses to large corporations. Lightweight and featuring a unique four-legged design, the KX-TS730 is capable of transmitting clear, crisp audio, even when you're sitting as far as 10 feet away from the speakerphone.

Ultra-Sensitive 4-Microphone System

This multi-microphone system consists of two microphones at each of the four corners that allow the unit to capture omni-directional voices at a distance. It is designed to receive audio in a 360-degree radius in rooms up to 380 square feet, so you can speak at a distance of up to 10 feet away and still be heard clearly. This allows you to move about the conference room with the confidence of knowing that your words will be heard clearly.

Full Digital Duplex Conferencing

Full digital duplex communication technology helps reduce the echo and dropouts commonly found in many speakerphones, leading to crisp and natural conversations. Panasonic neodymium speakers and eight hyper cardioid microphones (two at each corner) with active sound processing technology deliver hi-fi sound quality.

120-Minute Conference Recording

The KX-TS730 can record up to 120 minutes of your most important calls, so you can concentrate on the conversation, rather than writing endless pages of notes. And if you want to take your recording(s) with you, the KX-TS730 has a 3.5 mm Audio Out jack that allows you to record your conversations to cassettes, wave files and MP3 files.

Caller ID¹

This convenient feature allows the KX-TS730 to display the name and number of incoming callers on an amber glow LCD. And a memory capacity of 50 names and numbers allows for easy retrieval and direct callback.

Memory Dialer

You can store up to 100 telephone numbers for quick viewing and dialing. In addition to the ability to retrieve all your business and personal contacts quickly and easily, there's also a storage capacity of up to 32 digits that allows you to save lengthy long-distance access codes for overseas numbers (i.e., 10-10-xxx).

¹ Requires subscription to a name-and-number Caller ID service offered by certain local telephone companies for a fee.
